

Relevant Gold VTEM™ Survey Expands to South Pass

Vancouver, B.C. – November 19, 2025 – Relevant Gold Corp. (TSX-V: RGC; OTCQB: RGCCF) (“**Relevant Gold**” or the “**Company**”) is pleased to provide an exploration update for its >35,000-acre South Pass Gold Camp in west-central Wyoming. The Company has initiated a combined airborne high-resolution Versatile Time Domain Electromagnetic (VTEM™) and magnetics survey to acquire high-resolution data to aid in identifying secondary structures, conductive, and magnetic anomalies and refine drill targets across the South Pass gold camp. All VTEM™ data collection is expected to conclude at both South Pass and Bradley Peak in Q4 2025. The Company has also completed systematic geological mapping, rock chip sampling, and soil sampling campaigns in South Pass aimed at continuing to define exploration targets for 2026 drill planning. Assays for these are pending.

“These initiatives are designed to unlock the full potential of the high-grade and grossly underexplored South Pass gold district,” said Relevant Gold CEO Rob Bergmann. “Results from our sampling and drilling programs to date have confirmed high-grade, gold-bearing structures surrounded by broad, shallow zones of lower-grade mineralization. We expect the upcoming surface sampling to highlight additional gold zones, and the planned geophysical work will help us see deeper into known structures and define new targets for our 2026 drilling program.”

South Pass Exploration Update

Gold mineralization at South Pass is strongly correlated with sulfide-bearing shear structures (arsenopyrite-pyrrhotite-pyrite) and quartz veins hosted within the Miners Delight Formation. The 2025 exploration program utilized a combination of airborne VTEM™ magnetics, geologic mapping, and geochemistry sampling programs to identify new gold zones and provide needed infilling along known mineralized structures.

Airborne Geophysics

The VTEM™ survey is a **2,807 line-km** survey using **75 m line spacing**, designed to cover the majority of the South Pass camp. This will provide high-resolution conductivity and magnetic datasets, helping to identify concealed structures and anomalies, significantly enhancing drill planning and target ranking. This survey is being flown by Geotech Ltd. in conjunction with the previously announced survey program at Bradley Peak ([news release – September 5, 2025](#)), which received \$226,533 USD in matching grant funds from the Wyoming Energy Matching Funds (EMF) program ([news release - July 2, 2025](#)).

Lewiston Geology Mapping and Rock Chip Sampling

Geologic mapping, combined with rock chip sampling was undertaken in the southern Lewiston sub-project area to characterize areas with limited data and follow up on surface features intersected in 2024 drilling at Burr ([news release -December 18, 2024](#)). A total of **446 rock chip samples** were collected and submitted to MSA Labs in Elko, Nevada for gold and pathfinder element analysis. Results will be reported when received.

Windy Flats Soil Sampling

A total of **1,400 soil samples** were collected along **8 survey lines totaling ~32 line km** to help identify anomalies that could reflect concealed mineralized shear structures. Samples were spaced at 25 m

intervals on north-south oriented lines spaced every 300 m. Samples are being analyzed with a portable Niton™ XL5 X-Ray Fluorescence detector for pathfinder elements including: As, Cu and Zn.

Next Steps

- Airborne VTEM™ survey flights are expected to be completed in Q4 2025. Initial results and interpretations are anticipated in Q1 2026.
- Geochemical sampling and mapping results and assays are expected in Q4 2025.
- Data analysis, interpretations and target analysis expected in Q1 2026.

About Relevant Gold Corp.

Relevant Gold Corp. is a North American gold exploration company founded by experienced exploration geologists and operated by a highly respected team with a proven record of significant value creation for shareholders. Relevant Gold is focused on the acquisition, exploration, discovery, and development of district-scale gold projects in the state of Wyoming – one of the most mining-friendly jurisdictions in the United States and globally.

On behalf of Relevant Gold Corp.,
Rob Bergmann, Chief Executive Officer

Cautionary Note Regarding Forward-Looking Statements and Historical Information

This news release contains certain statements that constitute forward-looking information within the meaning of applicable securities laws. These statements relate to future events of Relevant Gold Corp. ("Relevant" or "Relevant Gold" or "the Company"). Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "forecast", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe", "outlook" and similar expressions) are not statements of historical fact and may be forward looking information. Forward looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such risks include, among others, the inherent risk of the mining industry; adverse economic and market developments; the risk that the Company will not be successful in completing additional acquisitions; risks relating to the estimation of mineral resources; the possibility that the Company's estimated burn rate may be higher than anticipated; risks of unexpected cost increases; risks of labour shortages; risks relating to exploration and development activities; risks relating to future prices of mineral resources; risks related to work site accidents, risks related to geological uncertainties and variations; risks related to government and community support of the company's projects; risks related to global pandemics and other risks related to the mining industry. The Company believes that the expectations reflected in such forward-looking information are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking information should not be unduly relied upon. These statements speak only as of the date of this news release. The Company does not intend, and does not assume any obligation, to update any forward-looking information except as required by law. This document does not constitute an offer to sell, or a solicitation of an offer to buy, securities of the Company in Canada, the United States or any other jurisdiction. Any such offer to sell or solicitation of an offer to buy the securities described herein will be made only pursuant to subscription documentation between the Company and prospective purchasers. Any such offering will be made in reliance upon exemptions from the prospectus and registration requirements under applicable securities laws, pursuant to a subscription agreement to be entered into by the Company and prospective investors.
